New Meyer Gage Calibration Laboratory

As of October 29, 2010, Meyer Gage Company Inc is extremely pleased to provide calibration and final inspection services with new instrumentation capabilities reaching dimensional accuracy levels down to a mere 2 millionths(0.05 microns) of an inch as part of our continuous improvement program.

Meyer Gage has recently completed construction of a dedicated, fully-automated climate controlled inspection room to promote the highest levels of gaging and measurement reliability standards while delivering the lowest level of measurement uncertainty than any other time in our 50 year history.

We've installed a Pratt & Whitney LabMaster Universal® laser-based universal length measuring (ULM) system for gage calibration that can precisely measure:

- length
- outside diameter
- pitch diameter
- linear displacement
- thickness
- taper
- inside diameter
- major/minor diameter
- lead

The ULM system maintains ultra-high accuracy by fully integrating a laser interferometer, zero Abbe offset design, and a large measuring table with center position, height, pitch, and yaw controls.

The Pratt & Whitney proprietary system helps remove operator-influenced errors commonly observed with traditional gaging methods, by using a computer-controlled, precision air-bearing slide and gaging fingers —to maintain a constant force during measurement.

The Labmaster Universal uses Pratt & Whitney's GageCal® software that automatically enters tolerances for:

- rings
- pins
- threads (calculates pitch/major diameter)
- plugs
- balls

The ULM and GageCal software combination also flags out-of-tolerance conditions.

To sustain these high levels of reliability, this inspection station is housed within a new 20' x 44' laboratory which includes a custom designed HVAC system with a microprocessor-based environmental management system to allow for more precise temperature and humidity control.

This new addition to our South Windsor, CT facilities can deliver some of the highest levels of gaging and measurement reliability in the industry. Meyer Gage has positioned itself to bring new levels of quality to our customers —now, within 50 nanometers of precision.

The Labmaster Universal (LM U306270) is suitable for virtually all internal (ID) and external (OD) measuring applications within a range of 0.020-inch (0.5 mm) to 14-inches (356 mm).

Some of the new ULM measuring capabilities include:

- gage blocks
- pin & plug gages
- tapered plugs
- end standards
- snap gages
- plain rings, threaded rings & plugs
- cylindrical setting gages
- API gages
- micrometers, indicators, LVDTs, calipers

The ABC's of Plug Gages

The ABC's of Plug Gages

Plug Gage Measuring - the art of using pre-sized precision metal plugs to determine the acceptability of diameters of drilled or machined holes.

Go/NOGO Measurement - A GO gage is used to check the lower limit of a hole. A NOGO gage is used to check the upper limit of a hole. If the GO gage enters the hole and the NOGO gage is unable to enter, the design specifications of the hole have been met.

Uses - for precision GO/NOGO measuring of hole sizes and depths, checking hole location and distance, and setting micrometers. All gages are uniformly 2" long with ground ends, allowing you to use both ends for increased gage life. Gages are Carbon Chrome Alloy Steel (grade 52100 bearing quality steel) and heat treated to a 60-62 Rockwell C hardness. All of our products come with a Certificate of Class Conformance, traceable to NIST (National Institute for Standards Technology). The size and "+" (GO) or "-" (NOGO) are laser etched with a Meyer Exclusive Serial Number feature to ensure traceability on your shop floor on all gages that are .061" and larger.

Class ZZ Gages - These gages have an inch tolerance of .0002" and a metric tolerance of .005mm. They are practical where good precision and speed are important.

Class Z Gages - These gages have an inch tolerance of .0001" and a metric tolerance of .0025mm. They are one half the deviation of the ZZ, for a better fit.

Class X Gages - These gages are available with an inch tolerance of .00004" and a metric tolerance of .001mm. These gages are used where greater precision is needed.

Class XX Gages - These gages have an inch tolerance of .00002" and a metric tolerance of .0005mm. They are one half of the deviation of the X. Great for your most critical needs.

Length and Finish - All gages are 2 inches or 51mm long with ground ends for long life.

52100 Steel - This is bearing quality, Carbon Chrome Alloy Steel heat treated to 60-62 Rockwell C hardness and is considered the preferred material for the highest quality plug gages.

Certificate of Class Conformance - Assurance issued with each shipment of quality gages that conformance characteristics are traceable to NIST.

NIST - National Institute of Standards and Technology

Serial Number Etching - A feature that is exclusive to Meyer Gages and essential in assuring traceability on the shop floor on all gages over .060".

Information on How to Take Care of your Meyer Gage

Clean the part before gaging.

Get rid of dirt, coolant, and chips.

Protect the gage from damage.

Nicks and burrs allow inaccurate results.

Do not force the gage.

Use light pressure.

Keep gages clean and oiled.

This increases wear life.

Avoid handling gaging surfaces.

Fingerprints cause rust.

What's the **Big Deal** about Laser Marking?

Our computer based, non-contact, thermal process produces a permanent medical grade mark on our gages. Through computer monitoring, the mark is carefully controlled to give consistent material penetration. This method gives superior quality control compared to other marking systems and traceability by serial number. All pins over .060" are marked with size and direction of tolerance.

NOTE: Cylindrical plug gage tolerance is GO (Plus) and NOGO (Minus).

Master cylindrical plug gage tolerance is 50% Plus, 50% Minus.

Master Setting Disc tolerance is 50% Plus, 50% Minus.

Cylindrical plain ring gage tolerance is GO (Minus) and NOGO (Plus).

PLUG GAGE USE

When using plug gages for Go No-Go inspection the Go member should fit into the work piece to indicate to the operator that the component meets the correct specifications. The No-Go member should not fit into the work piece. If it does this indicates to the operator that the component has been machined incorrectly and is out of specification.

For this reason the Go gage is usually selected close but above the lower limit size of the component and the No-Go gage is usually selected just under the high limit of the component.

For example: a component that has a size specification of .250" to .255". The Go gage in this example may be selected to be a .250" plus gage pin and the No-Go pin gage selected as a .255" minus plug gage.

These gages, if Class Z, will range from .250" to .2501" for the Go, and the minus gage will fall within a tolerance range size of .255" to .2549".

The use of the Go and No-Go gages are used to inspect the component for a pass or fail process only, and will not measure the exact size of the hole or slot in the component. As in the above example, some "good parts" can actually fail the Go No-Go test if they fall below the actual gage size within the tolerance or class of the gage. Below is described a standard practice for selection of the Class of tolerance gage pins with a certain tolerance component.

Plug Gage Tolerance & Selection

Standard practice in American industry is to allow 5% of the component hole tolerance for the Go gage tolerance and 5% for the No-Go gage tolerance. The go gage, whose nominal size is at the low limit of the hole to be checked is generally given a plus tolerance in order to insure that all parts accepted fall within the product tolerance.

For the same reason the No-Go gage, whose nominal is at the high limit of the product tolerance, is given a minus tolerance. In this age of strict product liability, perhaps it is better to reject a few acceptable parts than to pass any out-of-tolerance parts. The Go gage plus tolerance and the No-Go minus tolerance have become universal in American industry and 10% of the hole tolerance (5% at each end) is sacrificed to insure that all pieces accepted are within tolerance.

There can be several reasons for using finer or coarser tolerances than the 10% rule would dictate. In a case where the production process is such that a significant number of acceptable parts are expected to fall in either of the 5% areas of product tolerance which may be rejected due to gage tolerance, a tighter tolerance should be considered. The value of these parts or the effort necessary to re-inspect them weighed against the cost of a finer gage such as Class X, Class XX or Class XXX, can more than justify the cost of the finer tolerance.

What Plug Gages Are...

1. Used to inspect holes or slot for pass or fail conditions only.
2. Used as masters for setting micrometers, verniers, or calipers.

What Plug Gages Are Not...

1. Used to measure the exact or actual size.
2. Resizing tools, or reamers.
3. De bur tools, or clean out tools.

Certificate of Calibration

(long form)

Furnished with readings that are 5 decimal places to the right of the decimal point. These readings include 3 measurements per gage performed at the center and 1/16" in from the edge of the radius at both ends of the gage. Serial numbers are recorded on gagepins over .060". Included is a tamper proof sticker with paper certificate.

Certificate of Class/Conformance (compliance)

This certificate states that a specific gage or set of gages has been inspected by comparison with Master Gages traceable to the National Institute of Standards & Technology and found to be within the required tolerance. This certificate does not give exact size. Certificates of Conformance are available on new gages only. Certificate of Conformance certifies that a gage, as listed, is within proper tolerances and proper physical condition. (Furnished FREE with all orders from Meyer Gage)

Calibrations Traceable to NIST

Certificate of Calibration (long form certificate) gives exact size to specified tolerance. Certificates of Calibration are available with new or used gages after inspection. Calibration Certificates show actual gage measurements. Each certificate is numbered to match a number we etch on the gage providing traceability between the gage and the Certificate where gage size permits.

Individual Class Z Gage Pins*

Replace missing pins! Don't live with broken sets. We stock these replacement pins in even half-thousand sizes for immediate shipment. All pins over .060"/1.51mm are laser marked with size and direction of tolerance. But we don't stop there. We've also added a serial number lasered onto each piece for traceability.

Individual Class X, XX Gage Pins*

These pins have the same features as our Class Z pins, but with a .00004 tolerance limit and a .00002 roundness limit. They are great for your inspection needs or when you want to maximize your GO/NOGO tolerance limit. They're also a great way to calibrate measuring equipment, micrometers and calipers. We make all sizes for your special needs. All pins over .060" or 1.51 mm are laser marked with size and direction of tolerance. We've also added a serial number lasered onto each piece for traceability.

When an even tighter tolerance is needed, Meyer Gage now makes XX pin gages. With a tolerance of .00002 and a roundness limit of .00001, it's our tightest tolerance yet for your most critical inspection needs. They're our best gages to calibrate your measuring equipment, micrometers and calipers. All pins over .060" or 1.51mm are laser marked with size and direction of tolerance. We've also added the serial number for traceability.

| Inch | Class X | 2-5 | 6-9 | 10&up | Class XX | 2-5 | 6-9 | 10&up | | |

Handles furnished without bushings. Bushings sold separately. Custom engraving available at \$.25 per character.

English Gage Sets

Meyer Gage

Class Z Pin Sets

We started making the original ZZ back in 1965 and our competition has tried, but can't copy the quality of these affordable pin gage sets. We now have taken the extra step for the better pin gage, Class Z. Introducing the MEYER Z. A closer tolerance (.0001), more accurate, and better for your needs. (See top right corner of page for details.) We have done it again. We've made a better pin gage that no other has attempted with the same great features listed below.

Here is a comparison of Class ZZ and the Class Z gage pin specifications.

| | OLD Class ZZ | NEW Class Z |
|---------------------|-----------------|----------------|
| Size deviation: | 0.0002" | 0.0001" |
| Roundness geometry: | 0.0001" | 0.00005" |
| Surface finish: | 10 micro | 8 micro |

The Meyer Gage Class Z gage pin will meet or exceed the requirements of Class ZZ, and can replace the Class ZZ in any situation or application.

Metric Gage Sets

Class Z

Just look at this selection of Metric gage pin sets. If we don't make it, you probably don't need it! These sets have all the features of our English sets, but provide the finer increments in size that you just can't get by converting English to Metric.

Meyer Gage Class Z Pin Sets

FEATURES:

MORE FEATURES THAN GAGES COSTING TWICE THE PRICE.

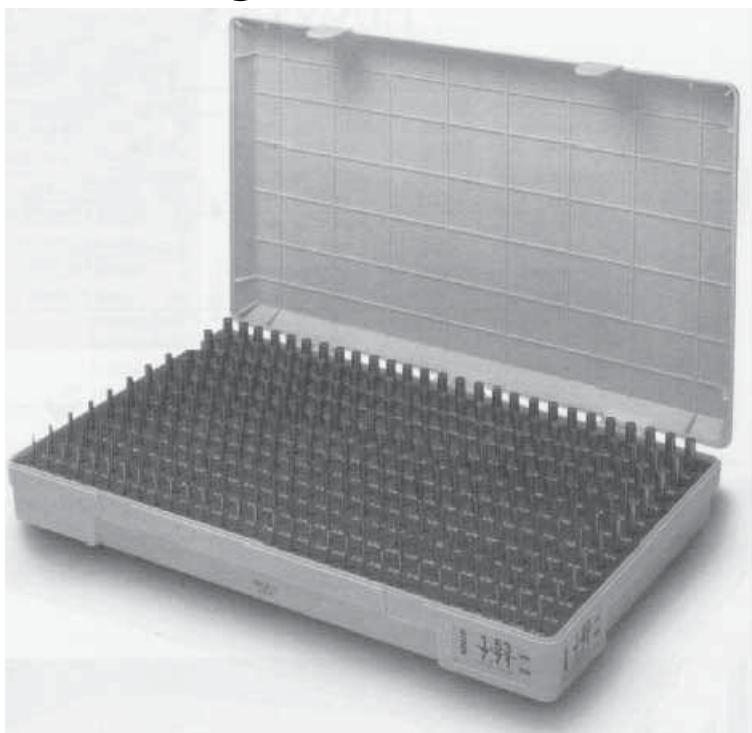

- All gages and sets are traceable to N.I.S.T.
- Boxes and gages both marked
- Size and serial number laser etched on each piece (M-0 not etched)
- Material: 52100 Bearing Steel
- No sharp edges
- 51mm overall length
- All sets in .02mm increments

USES:

- Checking locations
- Measuring hole sizes and depth
- GO & NO/GO gaging
- Setting micrometers
- Checking distances between holes

Finish:

- Centerless lapped
- Each gage is inspected and has a 8 microfinish or better
- Heat treated to a hardness of 60-62 Rockwell C
- All metric gages with .0025mm tolerance limit

Class X

Gage Sets

100% Inspected for ACCURACY!

Offers the same "features" as our Class Z pin gages, but with 0.00004" tolerance limits and 0.00002" roundness limits. The pins are perfect for critical inspection needs, or when you want to maximize your GO/NOGO tolerance limits.

They're also a great way to calibrate measuring equipment, micrometers, and calipers.

FEATURES:

- All gages and sets are traceable to N.I.S.T.
- Boxes and gages both marked
- Size and serial number laser etched on each piece (M-0X not etched)
- Material: 52100 Bearing Steel
- No sharp edges
- All members 2" long

USES:

- Checking locations
- Measuring hole sizes and depth
- GO & NO/GO gaging
- Setting micrometers
- Checking distances between holes

Finish:

- Centerless lapped
- Each gage is inspected and has a 2 microfinish or better
- Heat treated to a hardness of 60-62 Rockwell C
- All English gages with 0.00004" limit

Upgrade Existing Sets

| Model | Wt. (lbs) | Price |
|-------|-----------|---|
| L-E4 | 38 | four drawer cabinet, empty \$318.59 |
| L-IN4 | 46 | four drawer cabinets with inserts of your choice \$390.73 |

Used as masters to calibrate measuring equipment and check linearity of comparators, micrometers, and calipers. These "Tenth Step" gage sets have unlimited applications, such as quality control inspection, prototype work and production layout. Inspectors select from the range of pins to find the size of a hole or slot. These round masters simulate a cylindrical part which, unlike flat blocks, can detect uneven wear on the tips of micrometers and calipers. The thin "line" of contact detects uneven face wear better than flat gage blocks with large contact area.

Features:

- Each set contains 25 pieces of Class X tolerance (.00004") gage pins. Traceable to NIST
- Choice of two tolerances: Plus (+.00004") or Minus (-.00004")
- Sets consist of a center nominal size, and 12 gages larger in .0001" steps and 12 gages smaller in .0001" steps.
- Each gage is inspected and has a 2 microfinish or better.
- Heat treated and through hardened to 60-62 Rockwell C
- All pin gages over .060" or 1.51 mm are laser marked with size direction of tolerance and serial number for traceability.

| GAGE SET NO. | NOMINAL SIZE RANGE | | SET PRICE |
|--------------|--------------------|--------------------|-----------|
| | English | Metric | |
| MG1-25 | .0122" to .0609" | 0.28mm to 1.54mm | \$257.65 |
| MG2-25 | .0610" to .2509" | 1.55mm to 6.37mm | 128.18 |
| MG3-25 | .2510" to .5009" | 6.38mm to 12.72mm | 147.77 |
| MG4-25 | .5010" to .7499" | 12.73mm to 19.04mm | 203.92 |
| MG5-25 | .7500" to .8129" | 19.05mm to 20.64mm | 285.50 |

Custom Length

Class ZZ Gages

Reversible pin gages up to 12" lengths. These are invaluable when you need to gage deep or hard to reach holes or slots.

- Centerless ground to a 10 microfinish or better
- Made from HSS Steel
- Plus, Minus or Bilateral tolerance
- NIST Traceable
- Stabilized and heat treated to 62-64RC

No guarantee of straightness due to Centerless Grinding process on these products. Class ZZ custom length gages are not returnable for credit or cancellation.

Class X Gages

Reversible pin gages in English and Metric up to 6" lengths. Ideal for deep and hard to reach holes or slots.

- Centerless lapped to a 5 microfinish
- Up to 6" long
- NIST Traceable
- Stabilized and heat treated to 60-62 RC
- Plus, Minus or Bilateral tolerance

Custom Lengths

OVERALL LENGTH 3" inches

| Inch Size | Millimeter Size | Price |
|------------------|--------------------|----------|
| .0100" to .0299" | .254mm to .759mm | \$129.71 |

| .9376" to 1.000" | 23.82mm to 25.40mm | 263.87 |

No guarantee of straightness, due to Centerless Grinding process on these products. Class X custom length gages are not returnable for credit or cancellation.

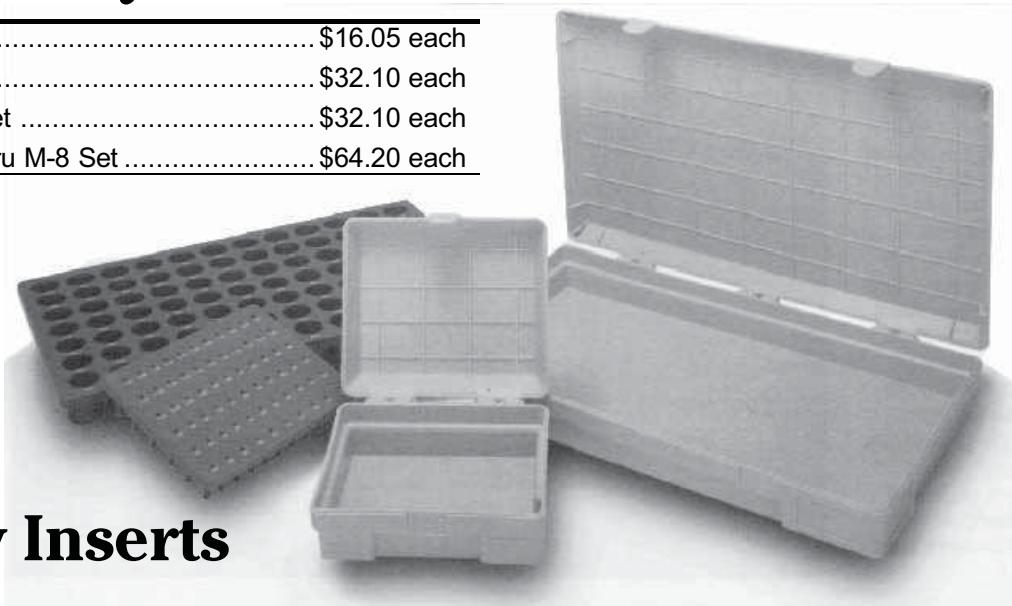

Gage Storage Accessories

Durable Poly Cases

| | |
|--|--------------|
| Poly Case for M-0 Set | \$16.05 each |
| Poly Case for M-1 thru M-8 Set | \$32.10 each |
| Poly Case with insert for M-0 Set | \$32.10 each |
| Poly Case with insert for M-1 thru M-8 Set | \$64.20 each |

Each hole size marked on insert.

Poly Inserts

| | |
|--|--------------|
| Poly Insert for M-0 Set..... | \$16.05 each |
| Poly Insert for M-1 thru M-8 Set | \$32.10 each |

Each hole size marked on insert.

Heavy Duty Metal Storage Cabinets

Upgrade Existing Sets

| Model Number | Wt./lbs | Price |
|--------------|---------|---|
| L-E4 | 38 | four drawer cabinet, empty \$318.59 |
| L-IN4 | 38 | four drawer cabinet, w/4 inserts (*) \$390.73 |

* Includes four inserts of your choice.

Be sure to protect your gages from heat and moisture. After use, each gage should be wiped clean of fingerprints and contaminants, then oiled with a rust inhibitor.

We recommend Tri Flow® lubricant for gage maintenance.

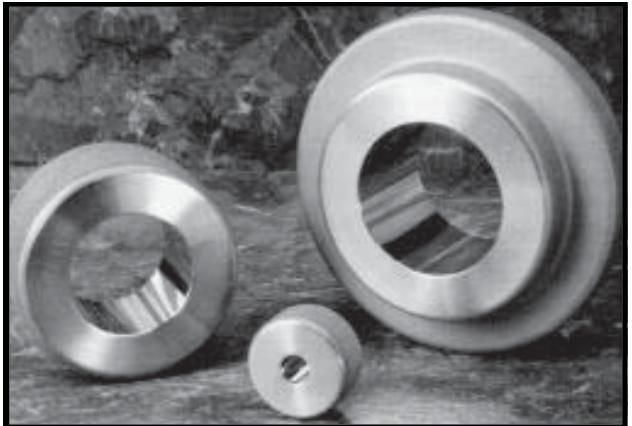

6 oz Aerosol Can \$9.19

Ring Gages*

The Meyer Difference

- The Material.** We use only superb quality steels such as 06, or Alloy Steels such as 8620, and Heat Treat our blanks to a minimum of 58RC.
- The Stabilization Process.** Subsequent grinding operations can introduce heat and stress. Meyer puts all blanks through a stabilization process, cycling them through temperature extremes from -130°F to +300°F.
- The Precision Lapping Process.** "Lapping" is the finishing process that removes small amounts of material from the gage surface and brings it within its final tolerance limits.
- Inspection with NIST-traceable gages.** In our Metrology area conditions are a strict, cool 68°F where the relative humidity is between 30 - 50% and all of our masters are traceable to NIST.

MASTER: bilateral (split) tolerance. GO: unilateral (one way) minus tolerance. NOGO: unilateral (one way) plus tolerance.

Ring Gages are manufactured in accordance with ANSI spec B89.1.6 - 1989. ROUNDNESS and TAPER of all gages will not exceed 50% of applicable gagemaker's size tolerance and are non-cumulative. *Ring gages are not returnable for credit or cancellation.

**Unilateral Tolerance, GO - Plus Tolerance, NOGO
- Minus Tolerance; Chrome Plates: Add 30%**

* -Not returnable for credit or cancellation

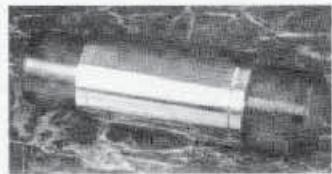

Custom Progressive Gages*

When you need to check parts quickly, Progressive plug gages are the best choice. Both the GO and NOGO diameters are stepped on a single gage member. All members are securely attached to either a Trilock or Taperlock handle. All handles are marked with sizes and direction of tolerance.

- Class XX, X, Y, or Z
- NIST traceable
- GO, NOGO tolerances
- Tool Steel 60/62 Rockwell C
- Certificate of Accuracy included
- Additional marking available \$0.25 per character

Master Setting Discs*

STYLE #1: Bilateral (Split) tolerance

STYLE #2: Unilateral (GO Plus NOGO Minus)

STYLE #3: Bilateral (Split) tolerance

You can use these Master Discs to calibrate your measuring equipment. They are a must for your calibration lab and your inspection areas. Meyer's Master Discs are available in three styles and come with a Certificate of Accuracy.

- Class XX, X, or Y
- GO, NOGO, Bilateral tolerances available
- Steel 60/62 Rockwell C
- Comes complete with end grips
- All inch masters are furnished with black insulators
- All metric masters are furnished with yellow insulators
- Red and Green insulators are available on special order
- Roundness is within half of tolerance

*Note: For the range above 1.510" to and including 8.510" A.G.D. standards for style #2 call for style #3 master discs separated by an A.G.D. separator plate and linked together with a tie rod and insulators. Not returnable for credit or cancellation. Call for sizes not shown.

Meyer Gage Thread Measuring Wires, together with a micrometer, are used to quickly & accurately measure pitch diameters of external threads. They are perfect for calibrating or checking wear threads plug gages, and are used to monitor and control pitch diameters manufactured threads. A tolerance of $\pm .00001$ " of the exact size of the wires and within $\pm .00002$ " of the best wire diameter (G) as specified for Grade A Wires.

- 100% inspection
- 2 microfinish or better
- Tool Steel
- All members 2" long
- Meets former federal Specification GGG-W-366b for Grade A Master Thread Wires

Taperlock Steel Thread Plug Gages

Thread plug gages are made of selected steel, manufactured with the finest equipment available, and meticulously inspected in every thread element. The name Meyer Gage is your guarantee of the finest in thread gages.

Standard in "X" tolerance.

Optional color gage handles available upon request — ideal to identify metric versus inch or master versus working gages.

The shanks on the gaging members are tapered to fit corresponding taper holes in the handles. Worn members may be removed and the handles salvaged for use with new members.

Member sizes 0 - 6 have male point in addition to length shown. Chip grooves are supplied on Go Members #10 machine screw and larger.

| Nominal Inch | Size mm | A Overall | B Go Member & Handle | Length C Handle Only | D Go Member | Handle | | |

Taperlock Steel Thread Plug Gages

- Machined from the highest quality oil hardened tool steels
- Manufactured on the latest equipment under ideal conditions
- Meticulously inspected in every thread element
- Chip grooves are supplied on all Go members #10 Machine Screw and larger
- Standard in "X" tolerance, standard A.G.D. dimensions
- Special thread plug gages available expedited delivery

HOW TO ORDER

- Quantity and type (member only, member with handle or double end with handle).
- Specify nominal size and threads per inch, Go and/or No Go.
- Class of fit: 2B or 3B.
- Handles are not included with single members.
- If handle is required with a single member, please specify "with handle" at time of order.
- Include special marking instructions if any.
- For Taperlock members with Chrome add 25%.
- Special Thread Plug Gages price on application.
- If Special Pitch diameter limits specify Go and No Go gages.

TAPERLOCK HSS THREAD PLUG GAGES TiN COATED

From start to finish, TiN coated Taperlock gages stretch your investment in quality. Meyer Gage gages feature high quality taper lock thread gages with a titanium nitride coating. TiN gages are first made of HSS Steel with the same care and accuracy all Meyer Gage gages display. Then we apply a thin coating of titanium nitride, offering an excellent, uniform hard coating with no loss of substrate hardness or physical distortion. The added hardness and lubricity of the coating gives you:

- Greatly increased gage life - up to 10 times longer than uncoated gages.
- Titanium Nitride (TiN) coated surface hardness is greater than that of the High Speed Steel base gage member.
- Increased corrosion and abrasion resistance due to the inert hard characteristics of the TiN coating.
- Reduced material build-up due to the added lubricity properties of the TiN coating.
- Gage members are manufactured from selected High Speed Steel and TiN coated for added abrasion resistance and wear life.
- Ideal for severe gaging environments.
- Chip grooves are supplied on all Go members #10 machine screw and larger.

TiN coated metric gages available, price on application.

When ordering, please use the item numbers.

TRILOCK REVERSIBLE STEEL THREAD PLUG GAGES

- Trilock gages are reversible, doubling gage wear life.
- When worn out at one end, they may be reversed on the specially designed handle and the unused end can be put to use.
- Available as Class 2B.
- Gage member is held on the handle by means of a socket head cap screw.
- For chrome, add 30%.
- For class 3B, price on application.
- Standard in Class X tolerance.

Handles are not included with single members. If handles are required for Go or No Go members, specify "with handle".

3B Gages are available and priced the same as 2B Gages.

When ordering, please use items numbers.

HELICAL COIL TAPERLOCK STEEL GAGES (STI)

- Standard in Class X Tolerance.
- Handles are not included with single members.
- If handles are required for Go or No Go members, specify "with handle".
- For "W" Tolerance add 33.3%.
- Titanium Nitride coated members available, price on application.
- Larger sizes available, price on application.
- Metric sizes available, price on application.

HOW TO ORDER

1. Specify quantity and type (members only, member with handle or double end with handle).
2. Specify nominal diameter and threads per inch Go and/or No Go.
3. Select class of fit, 2B or 3B.
4. Special marking instructions, if any.
5. If handle is required with a single member, please specify "with handle" at time of order.

HOW TO PRICE

1. Select desired size and class of fit.
2. For chrome, add 30%.

THREAD RING GAGES

- Manufactured from selected graphite steels to American Gage Design (AGD Style).
- Machined and accurately lapped for an exacting thread size.
- Meticulously inspected in every element.
- Best if purchased with and mated to a setting plug gage at the time of order.
- No Go rings are furnished with an identifying groove around the rim of the gage.
- Optional Thread Ring Gage Holders available, optional.
- Class 2 and Class 3 available on request.

HOW TO ORDER

- Specify nominal diameter, pitch and class of fit 2A, 3A, or Basic.
- Setting Plugs should be ordered at the same time as the corresponding ring gages.
- Request Ring Gages be set with new Set Plug before shipping.
- Left hand available, price on application.
- Larger sizes available, price on application.
- Specials available, price on application.
- Chrome available on rings, add 50%.

TRUNCATED THREAD SETTING PLUGS

- Truncated type thread setting plugs have a full form threaded portion and a truncated portion.
- The full form portion checks the pitch diameter and major diameter clearance.
- The Truncated portion checks pitch diameter and flank angle wear.
- Made from selected steels, ground and accurately lapped.
- Meticulously inspected in every thread element.
- Standard thread setting plugs are Class X tolerance on pitch diameter, while holding "W" tolerance on lead and angles.
- For Class "W" tolerance on pitch diameter, add 25%.

HOW TO ORDER

1. Specify Quantity.
2. Specify nominal size, pitch and class of fit 2A or 3A.
3. Handles are not included with single members. If handles are required for Go or No Go members, specify "with handles" at time of order.
4. Setting Plugs should be ordered at the same time as the corresponding ring gages.
5. Request Ring Gages be set with new Set Plug before shipping.
6. For Class "W" tolerance, add 25%.
7. Left hand available, price on application.
5. Specials available, price on application.

The shanks on the gaging members are tapered to fit corresponding tapered holes in the handle.

Worn members may be removed and the handle salvaged for use with new members.

Member sizes 0-6 have a male point in addition to the lengths shown.

METRIC STEEL TAPERLOCK THREAD PLUG GAGES

- Standard in 6H tolerance.
- For Taperlocks with chrome, add 30%.
- Left hand available, price on application
- Larger sizes available, price on application.

HOW TO ORDER

1. Specify quantity.
2. Specify nominal diameter and threads per inch.
3. Specify special markings instructions, if any.

HOW TO PRICE

1. Select desired size

METRIC THREAD RING GAGES

- Standard in 6g Tolerance.
- Manufactured from selected steels to American Gage Design (AGD Style).
- Machined and accurately lapped for an exacting thread size.
- Meticulously inspected in every element.
- Best if purchased with and mated to a setting plug gage at the time of order.
- No Go rings are furnished with an identifying groove around the rim of the gage.
- Optional Thread Ring Gage Holders available, optional.
- Chrome Plate Rings, add 50%.
- Left hand available, price on application.
- Larger sizes available, price on application

HOW TO ORDER

1. Standard in 6g tolerance.
2. Setting Plugs should be ordered at the same time as the corresponding ring gages.
3. Ring Gages will be set with new Set Plug before shipping.
4. Chrome available on rings, add 50%.
5. Left hand available, price on application.
6. Larger sizes available, price on application.
7. Specials available, price on application.

METRIC THREAD SETTING PLUGS

- Standard in 6g Tolerance.
- Left hand available, price on application.
- Larger sizes available, price on application

HOW TO ORDER

1. Standard in 6g Tolerance.
2. Specify Quantity.
3. Handles are not included with single members. If handles are required for Go or No Go members, specify "with handles" at time of order.
4. Setting Plugs should be ordered at the same time as the corresponding ring gages.
5. Request Ring Gages be set with new Set Plug before shipping.
6. For class "W" tolerance, add 25%.
7. Left hand available, price on application.
8. Specials available, price on application.
9. When ordering please use item numbers.

TAPER PIPE GAGES — NPT

American National Taper Pipe Thread Gages (NPT) are furnished to thread specifications which are in agreement with the National Institute of Standards and Technology American Gage Design dimensions as shown below.

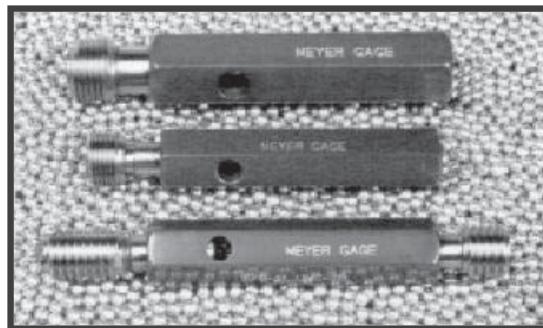

Master and reference gages can be furnished on request.

TAPER PIPE GAGES - NPT

- (NPT) are furnished American National Pipe Thread NPT TAPER PIPE GAGES made to American Gage Dimensions (AGD).
- To thread specifications which are in agreement with National Institute of Standards.
- Larger sizes and ANPT available upon request.

ADDITIONAL PIPE THREAD GAGES

- Straight Pipe: NPSF, NPSL, NPSC, NPSM and other special pipe gages available upon request.

L₁ THIN RING GAGES - NPT #19-00TP

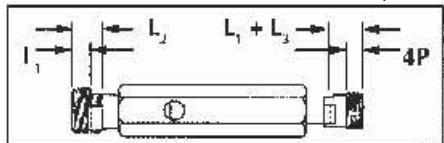

TAPER PIPE GAGES — NPTF

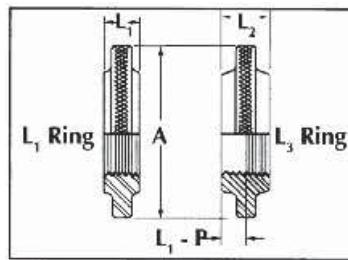

NPTF (Dryseal) Taper Pipe Gages

Dryseal pipe threads are generally used in more critical applications than NPT and, therefore, a greater variety of gages and/or measuring equipment is used to more adequately check size, taper, and thread form.

- L_1 and L_3 plugs supplied with 1 step as standard
- L_1 = Length of engagement in hand tight make up
- L_2 = Length of effective thread (external)
- L_3 = Length of 3 threads beyond L_1 for wrench make up.

• Plug Dimensions

• Ring Dimensions

GEAR MEASURING WIRES

- All Gear Measuring Wires meet or exceed former Fed. Spec. GGG-W-366b for Grade AM.G.W
- For three wire sets, add 50%
- For modifications to Gear Wires, prices furnished upon request
- For Carbide Gear Wires, prices furnished upon request
- Metric Module sets available upon request

- Wires are lapped to 2 RMS micro inch finish or less and measure to exacting specifications.

| .760 - 1.010" / .19304 mm - .25654 mm | 151.59 |

Pitch

2 thru 48

Flattening Price Per Set

\$61.25

Price is for flattening of each of two wires to 80% of wire diameter. For depth of flat exceeding 20% diameter, a quotation is required. For special gear wires, use price for flattening which is closer to standard dimensions.

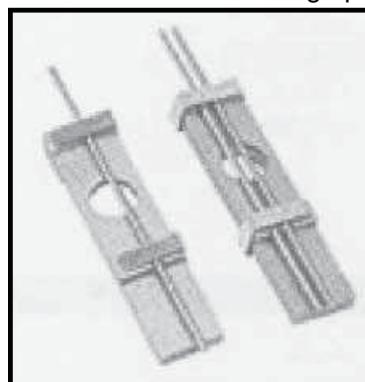

3-WIRE THREAD MEASURING SYSTEM

Wire Holders - The wire holders are fitted on anvils of the micrometer allowing the single and double measuring wires to accurately position in relation to each other. The extra length of the wire enables them to be adjusted up or down in the holders. This extends the life of the wires substantially. The holders are limited to their rotational movement by the "U" Track and thus are maintained in the ideal position for engaging any lead angle of a thread.

Measuring Wires - The measuring wires are certified to meet the following specifications:

Diameter: $\pm .000020"$
 Roundness: $\pm .000010"$
 Surface Finish: 2 Micro Inches

All measuring wires come with a certificate of calibration, which includes the actual wire size and the constant required in determining the pitch diameter.

Meyer Gage Corporate Message

There has always been a Meyer in the house. From founder Albert Meyer to John and James today, the Meyer feel for product quality and customer satisfaction is always guiding the growth of the company. "We are gage specialists, selling to a segment of the market that demands the most consistent, high level quality, at sensible prices, and we never forget it."

At Meyer Gage, everybody is very aware that the world of manufacturing and quality is changing constantly. Since 1960, we have been focused on producing the very finest, fixed limit gages, available in the world. Our company logo says it all, "Gage Makers for the World."

Keep your eyes on us as we are always changing to meet the challenges and needs of our most valued asset: you, the customer.

INTRODUCTION & COMPANY PROFILE

We are located in South Windsor, CT in a 28,000 square foot building. We have positioned ourselves to provide customers with quick response and short lead times at competitive prices.

Our specialty includes, but is not limited to the following:

Precision Fixed Limit Gages for use in Aerospace, Medical, Automotive Electronic and Metal Working Industries.

QUALITY POLICY STATEMENT

We will strive to ensure customer satisfaction by continuously improving the effectiveness of our process and providing on time delivery of defect free products to our valued customers. Complete customer satisfaction is our goal.

Each employee is responsible for reaching desired requirements each and every time by first, knowing and understanding his/her job function and then by performing each task to the best of his/her ability. When an employee believes there is a "better way" he/she has the power to initiate action to cause formal changes through management.

Comprehensive documentation governs our quality program, procedures, and practices. This documentation, some that affects product quality shall be formally documented and controlled. All such documents shall be maintained current and be easily accessible.

We are comprised of one facility located at 230 Burnham St., South Windsor, Ct. USA and have been in continuous operation since 1960. We are autonomous with our own documented quality system and a quality manual defining the method(s) of controlling product or service.

COMMITMENT TO QUALITY

As President and Vice President, we fully support the effort to maintain the quality system and its compliance to ISO 9001:2000. With this quality system we are committed to a strategy of continuous improvement by active participation of all employees resulting in total customer satisfaction. We place an emphasis on defect prevention, rather than defect detection. Quality is every employee's responsibility.

John Meyer, Vice President

James Meyer, President
